

Yogesh Sai Dondapati

Software Engineer @ Juspay | Bengaluru, India | yogeshsai02345@gmail.com | linkedin.com/in/ysd-/ | yogeshsai.in

SUMMARY

Backend/platform software engineer at Juspay working on payment infrastructure, authentication systems, fraud-risk lifecycle integrations, merchant analytics, and production transaction flows. NIT Durgapur CSE graduate with ownership across API contracts, provider integrations, data pipelines, 3DS authentication, Apple Pay routing, and production monitoring.

EXPERIENCE

Associate Software Development Engineer

July 2025 - Present

Juspay · Bengaluru, India

- Lead developer for Air India integration, supporting UAS/3DS authentication flows for 250K+ monthly card transactions.
- Tech lead for AIX integration, owning technical design, integration readiness, and production-oriented execution.
- Built UAS integration into Euler transaction flow, including API contracts, data pipeline touchpoints, authentication orchestration, and load testing.
- Designed multi-currency analytics architecture for merchant dashboards, supporting 20M/day transactions through the Express Checkout product.
- Integrated Accertify and Feedzai into fraud-risk lifecycle paths across pre-transaction, post-transaction, and pre-refund scoring.
- Built merchant-configurable country/currency blacklist and whitelist controls, and persisted merchant-specific transient data beyond cache for advanced dashboard analytics.

Software Development Engineer Intern

Jan 2025 - Jun 2025

Juspay · Bengaluru, India

- Owned production monitoring as primary POC for Indigo.
- Improved UPI flows and FRM enhancements across production-oriented payment systems.
- Built Apple Pay gateway routing and token handling support for encrypted and decrypted transaction paths.
- Selected through Juspay Hiring Challenge 2024.

SELECTED IMPACT

- 250K+ monthly card transactions supported through Air India card authentication flow.
- Lead developer for Air India and technical lead for AIX merchant integration work.
- Backend ownership across authentication orchestration, risk providers, Apple Pay routing, and dashboard analytics.
- Multi-currency merchant analytics support for 20M/day transactions through Express Checkout.

PROJECTS

NewsPulse

Oct 2025

Internal hackathon runner-up

- Built AI-classified engineering and business news summarization with Slack delivery and a searchable dashboard.
- Automated concise news delivery with recommended actions for faster discovery and decision-making across teams.

EDUCATION

B.Tech, Computer Science and Engineering

2021 - 2025

National Institute of Technology Durgapur · Durgapur, India

SKILLS

Languages: C++, Python, Haskell, JavaScript, TypeScript, SQL

Backend: REST APIs, Microservices, Distributed Systems, API Integrations, Webhooks, System Design, Payment Systems

Data: Relational Databases, Query Optimization, Data Pipelines, ClickHouse

Infra: Git, Docker, Kubernetes, AWS basics, Postman

Reliability: Load Testing, Debugging, Production Monitoring
